Introduction to Computer Science and Java Programming

CSC 1003

Fall 2025

Chenhao Ma

machenhao@cuhk.edu.cn

About the final exam

- Date: **December 18, 2025**
- Time: **13:30 – 15:30**
- Duration: **2 hours**
- Exam scope: From Chapter 0 to Chapter 9.
- Closed-book.

Breakdown

Around 10%: multiple-choice questions

Around 30%: read the program and give the expected output

Around 20%: read the program and find the bugs of the program

Around 25%: read the program and analyze the program

Around 15%: other short-answer questions, e.g., fill in the missing code/determine the type of the output

Review

chapter 0

a quick review

chapter 1

knowledge of programming development environment,

built-in data types,

type conversion

Review

chapter 2

sequential execution,

conditionals,

loops,

nesting & debug

(keyword: break, continue)

chapter 3

one-dimensional array,

two-dimensional array

examples:

```
int[] a = new int[10]; a[0] = 3;
```

```
Student[] a = new Student[10]; a[0] = new Student();
```

Review

chapter 4

standard input and output,
command-line arguments input,
redirection,
piping

chapter 5

basic concepts

Review

chapter 6

examples:

- convert an integer to binary,

- fibonacci sequence,

- hanoi tower,

- avoiding exponential waste

chapter 7

mathematical models

Doubling method

Review

chapter 8 & 9

create class and object

instance variables

constructor

methods

Please fill in the OCTE (1 bonus point, details please refer to BB announcement)
